DETAILED ACTION

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the first line says "A particle . . . comprising a substrate . . ." How can a particle comprise a substrate? Is the term "particle" a term of art, that has some meaning other than its ordinary dictionary meaning? Or does "particle" simply mean that the substrate and its contents are small, like a particle?

Each of the other independent claims is similar. The preambles state that the claims are drawn to particles, but nothing in the claims themselves say anything at all about particles. What weight should be given to the designation "particle"?
